

Accidents happen. But unpaid loaner car damages don't have to.

It's simple. Gather verifies the rental car insurance coverage of every customer and provides daily insurance to underinsured borrowers.

Ensuring your customer has adequate insurance takes more than just collecting a printout of the insurance card. What if the policy was cancelled? Or what if the customer doesn't have rental car coverage? If they get into an accident, your dealership could be left footing the bill.

Gather makes insurance verification easy. Using

the Gather kiosk or a mobile device, the customer provides consent and takes photos of their driver's license, their insurance card and themselves. Then, Gather delivers a report with the results to your dealership. If they pass, you can hand over the keys confidently. If they fail, you can still save the sale by offering them **daily rental car insurance with coverage levels starting at \$50,000** through Gather.

Monthly Verification Cost

\$199 + \$50

Software Fee Per Vehicle

"Rental Car" Insurance Cost

\$20

Starting Daily Rate | Ability to Up-Charge

Monthly Kiosk Cost

\$149
