

# Identity and insurance verification for every stage of the customer journey

With a simple 50-second consumer process, Gather delivers the information you need to know... when you want to know it.

From the showroom to the service drive, customer verification is essential to protecting your business and its profits. But the current process has its challenges. Insurance cards aren't always active or compliant - and driver's license scanners don't always detect fake IDs.

Gather makes verification easy. **The customer simply provides consent and takes photos of their driver's license, their insurance card, and themselves.** Then, Gather goes to work using a combination of biometric data and other proprietary sources to verify their identity - and connects directly with the insurance carrier to authenticate coverage.

Plus, if the customer is buying a new vehicle, we even update their auto policy with the new vehicle being purchased and deliver the insurance documents directly to your dealership.

## The Key Advantages Gather Provides:

- Prevent fraud-related theft
- Prevent car insurance premiums from interfering with your deals
- Prevent insurance agents from poaching F&I sales
